Apsidien365

MICROSOFT 365 PROVISIONING & GOVERNANCE
Bringing control, consistency, and calm to Microsoft 365

Addressing the Complexity, Challenges and Chaos of Microsoft 365
Apsidien365 enables self-service creation and governance for every Microsoft 365 workplace.
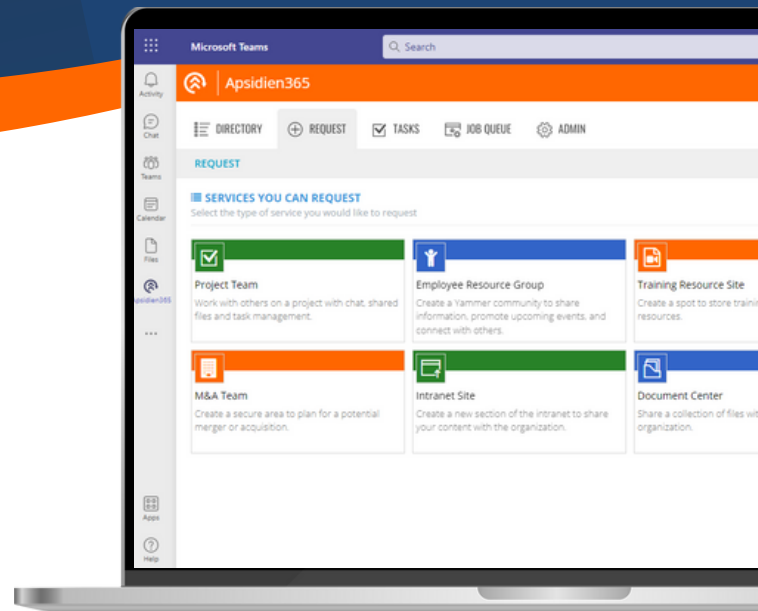

Designed from the cloud up for Microsoft Teams, SharePoint Sites, Microsoft 365 Groups, Planner Plans, Yammer Communities, and more, Apsidien365 gives control to administrators, self-service empowerment to users and peace of mind to management.

With its intuitive user interface, Apsidien365 is easy to deploy, easy to configure, and easy to use. Combined with built-in templates and approval processes, this powerful solution helps to bring control, consistency and calm to your Microsoft 365 workspaces.

WHY APSIDIEN365?

The user-empowered flexibility of Microsoft Teams, SharePoint Sites, and Groups makes it easy for Microsoft 365 to get out of control very quickly. Apsidien365's powerful feature set brings workspace governance to life, solving real-world business challenges within Microsoft 365.

Keep control of your environment while giving your organization the freedom to create a digital spot to work together whenever they need it. Apsidien365 organizes your requests into repeatable templates for consistent and secure usage across the organization.

TEMPLATES
Add a specific structure or set of capabilities for common scenarios and encourage the use of powerful tools and techniques to increase efficiency.

PROTECTION
Prevent external sharing or apply different controls to properly secure and protect information across the organization.

APPROVALS
Require approvals for governed areas or let some categories of work get created on demand.

NAMING STANDARDS
Define and apply naming standards to each spot to help both users and administrators understand the intent of the area.

ADDITIONAL INSIGHTS
Gather and require additional information, like a secondary owner or a project member, to gain a better understanding of how the tools are being used and to help manage the environment over time.

SELF-SERVICE
Let your people get what they want, when they need it without losing control of the environment.

How Apsidien365 Rises to the Workspace Governance Challenge

Leveraging Microsoft Azure and the Microsoft 365 product stack, Apsidien365 provides guiderail-based governance for Microsoft 365 workspaces incorporating provisioning, workspace lifecycle management, and permissions management, enabling governance for content and workspaces like never before.

PROVISIONING

Rapidly provision Microsoft Teams, SharePoint sites, Microsoft 365 Groups, Yammer Communities, and Planner Plans with built-in templates, approvals and security.

COMPLIANCE

Configure approval processes, track actions for auditing, define rules, report changes, and manage permissions of all your Microsoft 365 workspaces.

LIFECYCLE

Create, manage and dispose of Microsoft 365 workspaces to enforce governance policies with minimal disruption to the end-user experience.

Simple Pricing. Billed Annually. No Hidden Costs.

Our licensing is very simple. It is based on the number of licensed users in your Microsoft 365 tenant.

Up to 100 Users	Up to 250 Users	Up to 5,000 Users	Up to 15,000 Users
$1000	**$2000**	**$2.75** /user	**$2.25** /user
Per Year No Base Cost Support Included	Per Year No Base Cost Support Included	Per Year $2,000 Base Cost Support Included	Per Year $2,000 Base Cost Support Included

What's Included?

UPDATES FOREVER	UNLIMITED SUPPORT	AZURE SECURITY	NO LICENSE GUARANTEE	ONBOARDING SERVICE
Cloud power means you're up-to-date, always.	Support for the life of your subscription.	Our solutions are built and hosted in Microsoft Azure.	Our features will NEVER require additional Microsoft licenses.	We'll get you up and running like a seasoned pro in no time.

HOW MANY LICENSES DO I NEED?

You need to license Apsidien365 for every licensed user in your Microsoft 365 tenant. Guest users and external users are not counted against your license quota.

Users that have a license for Exchange (mailbox), SharePoint or Teams are considered to be licensed users of your tenant.

Users that have licenses for non-collaborative services within your tenant (such as PowerBI) or users that use other services (such as Dynamics 365) without Office or Microsoft 365 licenses are not considered licensed users of your tenant.

HOW DOES MY SUBSCRIPTION WORK?

Apsidien365 is licensed on an annual basis. We will automatically renew based on your updated user count and bill when your renewal is due.

WHAT OUR CUSTOMERS SAY

"It's a secure, powerful, yet low-cost provisioning tool - a perfect fit for our security conscious customers."

"We have not had to invest in an enormous technology solution that we only use one part of - we have a flexible, agile tool that works exactly the way we want it to."

"Our users feel empowered and we are confidently building our digital workplace across the globe."
